

December the First 2022 – save the date...

December the First 2022 – save the date...

So, I'm lucky. Although my dad died when I was months old, I get to have a chat and laugh with my mum daily. She's 97 and you might have met her when she delivered her Inspiration-On-QUBE Talk in 2017.

"So, I'm lucky.

Recently, I moaned to her about the state of the world. I guess you see it too. It's abysmal. A long list of issues. A popularised list of 'solutions' that you and I know will not ever resolve the actual problems. Do you also have a lingering sense of anxiety, foreboding you can't shift?

Do you recognise this? Are you, like me, reflecting and reviewing your priorities in life?

I was telling her how much I wanted to flip everyone around me from dreams of the great-resignation & retirement back to hope & purpose. She reminded me of a saying, *"To know where you should go you must know where you come from."*

"Do you recognise this?

So I've been looking back at the times you and I spent together, a *'Retrospectacle'* if you like, the challenges, the laughter, the insights, the meals, the events, the qubots, the videos, the networks and all the richness we enjoyed.

December the First 2022 – save the date...

Weren't those times great? For me, tough or not they were full of hope for the future. We did seize the promise of the New World After Midnight. Why did it work? I'm sure you have your view.

”Imagine if we looked forwards..

Imagine if we looked forwards, a '*Telescopic*' if you like. Imagine if we could dare to dream big. To seize back the positive opportunity of the New World. To once again feel the energy and rush of excitement.

BE SURE THAT OUR BEST DAYS ARE YET TO COME .

Are you in? I'd like to tell my mum that you're already looking back, with a view to looking forwards >>Emotional Blackmail<<, to get you to pencil in **1<sup>st</sup> December**.

”What would your **greatest hope** *from* it be?

Now you've decided participate, imagine you're either Gandalf the Great creating the conditions for hope & purpose or you're a maverick like Tom Cruise in Top Gun, wanting to get stuff done against all the odds. Now imagine that ours is going to be the best telescopic ever. What would your **greatest hope** *from* it be? I shall use responses to design. And will send a second message in a few days with details when you reply. I'll make sure you can join in wherever or whenever you are.

Eddie
