

## Enabling Innovation & Change for Healthcare & Wellbeing

In 2016 we had a unique opportunity to hear from and connect with some of the great leaders in Health Innovation including: **Dr Catherine Calderwood**, the Chief Medical Office for Scotland; **Peter Bak**, the CIO of Canadas IoHT Humber River Hospital; **Derek Feeley**, President and CEO of the Institute of Healthcare Improvement and many more.....

Last year over 300 dedicated healthcare professionals from 23 organisations including NHS Boards across the UK from Orkney to Devon, UK Innovation centres, Health Services Authority Canada, Institute of Healthcare improvement and health & digital industry gathered together digitally to share insights and innovation best practice, learn new tools & creatively solve real challenges.

We call this QUBEx. And this year we would like to give you the chance to join this amazing community

### What will we be doing?

As pressures and challenges build we can either *work harder using the knowledge we already have* or we can *collaborate and innovate*. We can guess which one you will choose.

### Are there specific themes?

Three themes will be interwoven.

- **Building** Capacity and Capability for Innovation
- **Understanding** digital innovations and how we might adopt them
- **Leading** effective, agile change & innovation in organisations with high levels of governance and bureaucracy

### Will my time be wasted?

No. You don't waste your time and we won't waste it either. You should participate because you will:

- Hear about some amazing technologies and new ways of working from the world's leaders in innovative health solutions.

- Meet & network with other innovators from around the world, identifying opportunities to collaborate.
- Add participating in QUBEx to your continuous professional development (CPD) time.

### Will I actually be able to apply what I learn?

**Innovation and change** can feel impossible in health organisations faced with tight budgets, deadlines, unrealistic targets and firefighting. We will share with you simple to use but amazingly effective tools & techniques from [Prof Eddie Obeng](#), one of the worlds leading experts. You will be able to create the change you wish to see.

### Where is it?

*The sessions will be held wherever you are.* All you need is a computer & an internet connection to participate. You will be swept up and totally absorbed into an Enhanced Virtual Reality conference. There you will have the freedom to talk, walk, scribble on flipcharts & even post sticky notes on wooden whiteboards.

### When is it?

There are only five opportunities this year. **12.30-14.00 UK on March 1st, May 3rd, July 5th, Sept 6th, Nov 1st**

### Is it free?

Yes. Surprisingly it is. This is a real gift not a sales teaser. It is free because the costs are covered by our generous Sponsors. Our Sponsors tell us that they have great admiration for healthcare professionals so covering our costs is the least they can do.

Thank you Sponsors:
