

QUBE-on-a-stick

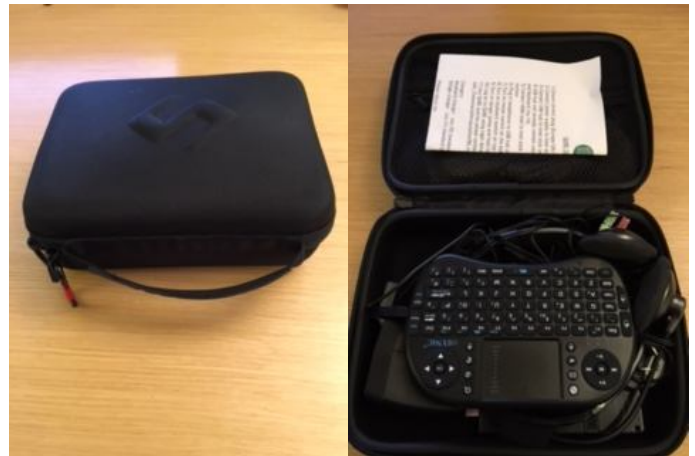

Assembly is easy:

All the connections needed to set up QUBE-on-a-stick are numbered.

Simply plug the pairs of numbers together.

The case contains everything you need to be on QUBE in a few minutes.

- a. Nano-computer (Nano-PC) QUBE will run automatically
- b. Keyboard
- c. USB hub 4 sockets
- d. Mouse
- e. Wifi Wireless Device preloaded with 3 GB data (3 month validity)
- f. Headset
- g. Keyboard charger - (no.10) standard USB charger
- h. Wifi Wireless Device charger - (no.11) standard USB charger

Step 1) Ensure correct plug (Europe/UK/USA) is in power supply (no.18)

Step 2) Connect power supply to Intel stick (no.17)

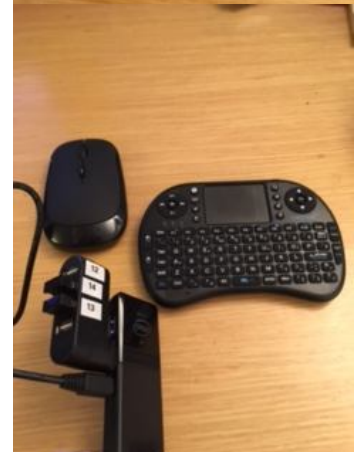

Step 3) Connect USB hub to Intel stick (no.16)

Step 4) USB hub will already contain connections for mouse (no.13) and Keyboard (no.14)

IMPORTANT: You can replace the enclosed keyboard and mouse with standard sized equipment if you prefer.

Step 5) Connect HDMI lead to Intel stick (no.15)

Step 6) Connect opposite end of HDMI lead to your monitor

Step 7) Plug in headphones to USB hub (no.12)

Step 8) Turn on mouse (switch on the bottom)

Step 9) Turn on keyboard (switch on top edge)

Step 10a) Connect with the mobile wifi enclosed. Turn on white mobile wifi (press and hold long button next to display) It will connect automatically. The code is in the inside of the lid

Step 10b) Connect the Nano-PC to your local guest wifi. Standard Windows 10 method. Select wifi icon and choose the network

Step 11) If there are multiple machines plugged into your monitor, you may need to change the input settings to HDMI. There will usually be a button to access the relevant menus on the front of the monitor or underneath it.

Step 12) Log on to QUBE using login details provided in your Entry Pass

Step 13) Power or charge as necessary:
Keyboard charger - (no.10) standard USB charger
White wifi device charger - (no.11) standard USB charger
